Odinaka Kingsley Obeta @ObetaOdinaka · Dec 21, 2023

T3. In Nigeria, factors such as limited health literacy, some cultural beliefs and practices and socioeconomic challenges poses a significant barrier leading to poor understanding of the complexities of #AMR and the importance of responsible antibiotic use.

You can answer by either **quoting** the question then include your text, OR simply **replying**

# Prepare your answers!

## Questions:

– **Introductions first (5-10 mins, then questions asked every 10 mins thereafter)**

T1: How can healthcare providers and policy makers work more closely with patients and community organizations to combat AMR?

T2: What specific actions would you like to see world leaders commit to in order to address AMR, when they meet at the UN General Assembly in September this year.

T3: How could we simplify AMR messaging to reach a wider community?

T4: How can patients or carers with lived experience of AMR impact the public, communities, policymakers, and others?

CT: Any closing thoughts about how people can become leaders to tackle AMR?

**Refer to the blog to prepare your answers as the dialogue can move quickly**
